Packaged Pumping Stations

Design, install, commission, maintain

The answer lies in the simplicity of our Packaged Pumping Station (PPS) offering, ensuring that Xylem can provide a reliable solution for your pumping needs. Our pumping and system engineering experts will guide you through every aspect of your project, delivering a solution backed by the assurance that we exclusively use our own Flygt pumps.

Our PPS solutions leverage the simplicity of Flygt prefabricated Packaged Pumping Stations, fully equipped with pumps, valves, and pipework, ready for delivery and easy installation on-site. As the market leader in submersible pumps, we've developed a comprehensive range of PPS options, suitable for everything from single dwellings to major developments.

Xylem provides:

- Pre-sales support from our technical sales team
- Ability to meet your program requirements
- Standard product availability 2-3 weeks
- Dedicated design and contracts engineers
- Project drawings and documentation
- Competitive prices
- Xylem's own Flygt Pumps
- Xylem's digital remote monitoring and control
- Planned Preventative Maintenance (PPM) Contracts
- 24/7 nationwide emergency service support

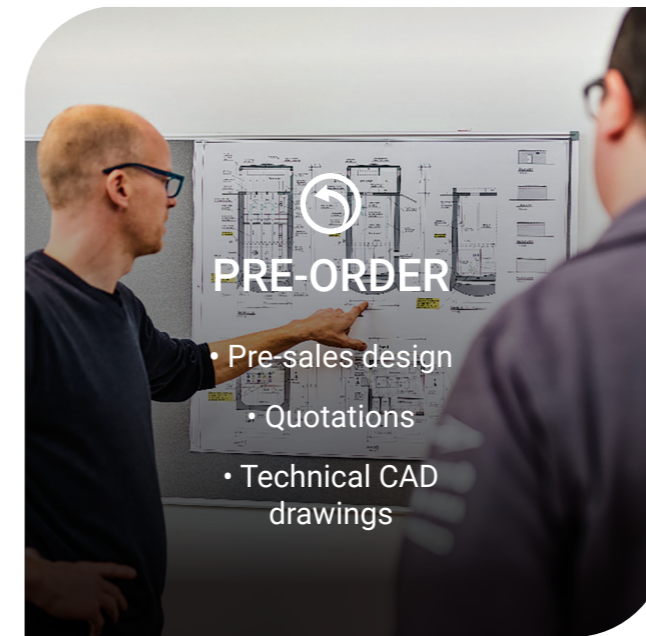

Xylem's PPS offering:

Ideal for builders and contractors seeking cost effective solutions for water and wastewater removal:

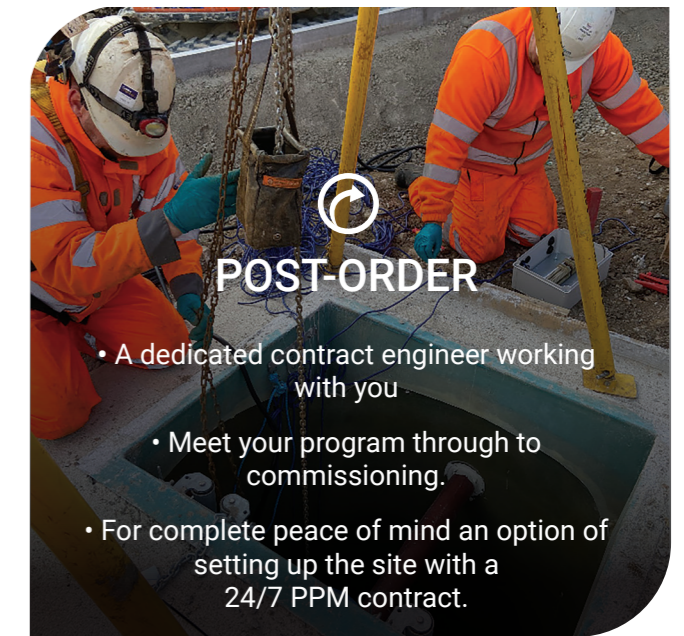

- Prefabricated pumping stations designed for affordability
- Full range of standard sizes available
- Custom sizes can be manufactured to suit specific needs
- Suitable for a wide range of applications and budgets

Our simplified process from concept to completion

PRE-ORDER

- Pre-sales design
- Quotations
- Technical CAD drawings

POST-ORDER

- A dedicated contract engineer working with you
- Meet your program through to commissioning.
- For complete peace of mind an option of setting up the site with a 24/7 PPM contract.

From pre-sale and throughout the entire lifetime of the products, Xylem provides customers with the highest possible level of care.

Preventative Maintenance Agreements

A Preventative Maintenance Contract (PPM) is a cost-effective service contract from Xylem tailored to meet your specific requirements and budget. A PPM will identify potential weaknesses in your system and provide the opportunity to take action before it leads to a breakdown.

Monitoring and managing your assets

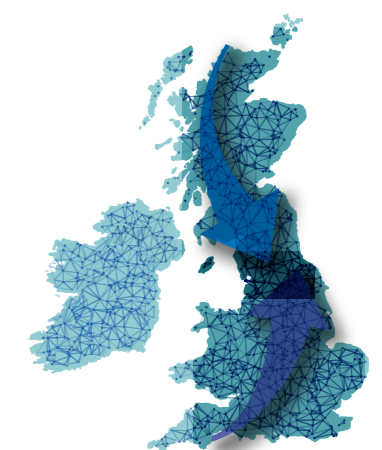

To help reduce downtime and the potential of flooding, Xylem provides remote monitoring and control of your sites giving you complete peace of mind 24/7. Proactively managing your pumping station, we can report energy usage, hours run, cycles performed, alarms and power failures.

Warranty

Xylem has confidence in both its products and service skills, and provides a 12 month standard warranty.

Nationwide Service Centres

Our nationwide network of strategically located service centres ensures local comprehensive support and service including 24/7 emergency call-out, workshop repair facilities and pumping station upgrades and refurbishments.

Standard range - GRP

Product	1200 Series	1500 Series	1800 Series	2500 Series
Diameter	1.2 meters	1.5 meters	1.8 meters	2.5 meters
Depth	2.5, 3 & 4 meters			
Tank Weight	170kg (approx.)*	390kg (approx.)*	440kg (approx.)*	590kg (approx.)*
Number of dwellings	up to 20*	up to 40**	up to 60**	up to 80**

Bespoke tanks available on request.

GRP - Glass Reinforced Plastic.

*Based on a tank 2.5 metres deep

**These guidelines are based on the minimum recommended depth below sewer and the effective volume indicated, all of which may be increased by having additional depth below the sewer.
