

Detect and locate wire breaks in near real time with acoustic fiber optic technology

Protect critical infrastructure by preventing failures

Enable proactive renewal of at-risk pipes

Safely maximize your pipeline's useful life

Track structural deterioration to inform long-term capital planning

Access data any time, on any device via a map-based web portal

Seamlessly integrate monitoring data with your systems using API

Receive email alerts about events of concern

Remote and onsite warranty services ensure system performance

Xylem's cybersecurity program protects your data

Trained analysts and AI filter data to report only events of concern

## SoundPrint® AFO

Continuous remote monitoring platform for prestressed concrete cylinder pipelines

### Critical Asset Protection

Reduce risks and costs with accurate pipeline condition data

### Asset Management Insights

Make confident long-term decisions and investments

### Actionable Data

Access monitoring data on a cloud-based dashboard

### Long-Term Partnership

Leverage our dedicated support team and hardware warranty
