REF: 245 style Redi-Clamp Part Number Change (-400)

Effective immediately, our 245 style redi-clamp part number end codes pertaining to our ¼" thick, lug-to-lug gasket will change for those sizes 2" (2.38") and smaller. Those smaller sizes came with a (-400) end code which signified a ¼" thick gasket without the lug-to-lug coverage however they will now come with an (-800) end code. Main takeaway points with this change are:

- We have made a small change in our gasket cut length for those smaller sizes so it will provide a lug-to-lug coverage.
- There is no change in pressure rating and pricing for this update.
- Example: Previous PN 245-00023806-400
Updated PN 245-00023806-**800**

NOTE: See updated price book sheet (pg. 21) with updated part numbers.

Regards,

Jeff Beauchamp
