

Ship Key Spare Parts to Reduce the Risk of Unplanned Outages

HOLDING AN INVENTORY OF ESSENTIAL PARTS ON-SITE WILL ENABLE CRITICAL REPAIRS AND AVOID UNPLANNED DOWNTIME

The current environment puts a lot of stress on your teams, workflow and infrastructure. Ensuring sufficient cover on the ground is a challenge that confronts all teams trying to keep the lights-on for critical infrastructure.

Xylem can ship the most important spares you need on a short notice and help repair your critical water infrastructure

- Trained service engineers to carry out emergency repairs and maintenance
- Inventory of critical Flygt product parts including mechanical seals, Flygt N-technology parts, Subcab cables and bearings
- Inventory of critical Godwin product parts including mechanical seals, non-return valves, wear plates, bearings, impellers, shafts, compressors and ejectors
- Inventory of UV lamps for Wedeco UV disinfection systems
